

ARGONNE NATIONAL LABORATORY

1/31/80

Gail:

Dr. Rowland was in here this morning and
was looking at the charts listed below:

40-003
40-009
10-012

They are the only Pu cases which do not
have a code in SAC to indicate whether they
are living or dead, except for CHI/3 Unknown
which was lost and which we can forget.

(We lost track of person--we have the file.)

He would like to have you code in the following
for these people:

| | |
|--------|---------------------|
| 40-003 | L78 (Brues memo) |
| 40-009 | L75 (Her signature) |
| 40-012 | L74 (His signature) |
